To Our Many Customers and Friends

It is with pleasure that we present to you our new seed catalog, and thank you for the kind words of encouragement, the splendid business, and the generous testimonies we have enjoyed from you during the past season. It is encouraging to know that at least some are greatly appreciating our efforts to maintain and improve the high quality of Rohrer's seeds. We trust that to all of you our seeds and service have been satisfactory and profitable enough to warrant the entrusting of a large portion of your orders to us for the coming season.

We greatly esteem the ever increasing patronage and confidence of our customers and it is our constant desire to so serve that each year may find all of you satisfied customers and friends.

We extend to you our very best wishes for health and prosperity during the year of 1934.

Yours Very Truly
P. L. Rohrer & Bro.

Every Seed You Buy Must Satisfy You—Or Your Money Back

Any seed purchased from us must be of the quality it is represented to be. If not, you may return them—at our expense. Your money will be immediately refunded.

Bags

Unlike most firms the bags we furnish are free *and not weighed in with* the seeds. This practice saves you real money.

Freight Prepaid

On all orders of 150 pounds, or more (except Seed Potatoes and Onion Sets), shipped at any one time to any freight station in Pennsylvania, New York, Massachusetts, Connecticut, Rhode Island, Delaware, Virginia, West Virginia, Maryland, New Jersey and Ohio. All prices on Garden Seeds are postpaid. We do not pay express charges.

Express Shipments

Amounting to 150 pounds, or more (except Seed Potatoes and Onion Sets), are shipped "Charges Collect". Check will be mailed allowing you the actual freight charges we would have paid if shipped by freight.

Parcel Post

When you want Field Seeds shipped by Parcel Post, please add extra for postage, as the catalog prices on Field Seeds do not include postage.

Prices

Latest price list of Farm Seeds is mailed with each catalog. If you are not ready to place your order when the catalog reaches you, write for the latest price list before ordering.

Order Early

It is important to order as soon after you get the catalog as convenient so you can secure the full benefit of our present low prices, and you will have your seeds on hand for planting when you want them.

Terms of Payment

All orders must be accompanied by cash. OUR GUARANTEE PROTECTS YOU. Registered Letters, Money Orders, Checks or Drafts preferred. Postage stamps often reach us in a worthless condition and are not desirable.

Non-Warranty

Every care is exercised to give all customers seed of good quality that will prove profitable and satisfactory yet the following clause is to be made plain. P. L. ROHRER & BRO. cannot possibly give any warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds it sells and cannot be responsible for the crop.

P. L. ROHRER & BRO., Smoketown, Lancaster Co., Pa.

Clover, Grass and Field Seeds

Field of Domestic Broad Clover

Clover Seed

Of all the crops grown on the farm Clover is the most important, not because of its market value and importance as a forage crop, but its great value as a fertilizer. Farmers should use this valuable seed freely as there are many profits derived from it. As a forage plant one of the different varieties is adapted to every section of the country, and everything considered there can be no doubt that the Clovers are the most valuable of all forage crops.

By using good seed the grower will derive a real benefit, first from the hay crop, and greatest of all, the upbuilding and maintenance of his land.

The sowing of Clover is absolutely essential to proper rotation of crops and to keep up the fertility of the land. The progressive farmer will sow Clover seed liberally in order to keep up the productiveness for other crops. A good crop of Clover will restore fertility to land and put more humus into the land than most any other crop.

We sell only the very highest grades obtainable; highest in purity and germination. Why not grow a few more loads of hay from the same acreage. Sowing our GUARANTEED SEEDS will help you do it. We specialize in Clovers, and feel safe no one can offer better values, either as regards to quality or price. The most careful attention is given our Clover Seed, as it constitutes a large percentage of our entire Seed Business.

SOIL. Clover makes its best growth on rich, fertile, well drained limestone soil, but if the seed is inoculated will flourish on most any soil where there is sufficient rainfall. Clover will grow and flourish in a soil that is low in nitrogen as long as there is a sufficient supply of bacteria to start the plants until they have an opportunity to develop tubercles on the roots for the purpose of gathering nitrogen from the air and storing it in the soil.

Domestic Brand Medium Red Clover

"Medium Red Clover" also known as "June Clover" is by far the most important Clover in our country. Medium Clover is second to none as a soil strengthening crop, adding fertility to the soil, making it possible to grow larger and better crops of corn and other grains. It grows about two feet high yielding two to four tons of hay per acre. This is also valuable for pasturing. The long roots penetrate deeply into the soil gathering nitrogen from the air and storing it in the soil in the form of nodules on the roots, thereby providing rich foods for crops, cereals, etc., which follow it. Quality of seed is very important. When sowing Clover seed be careful to sow nothing but pure, clean seed, which are plump and will germinate readily and produce hardy vigorous plants. Poor seed is the poorest kind of economy. Many farms and crops

have been almost ruined by sowing low grade seeds containing noxious weeds. If you do not want weeds don't sow them. Use our DOMESTIC BRAND CLOVER and you need not worry about polluting your farm with noxious weeds. Don't fail to get our samples and prices before placing your order, as you will find nothing better than our DOMESTIC BRAND CLOVER. If sown alone use six to eight quarts per acre. Where Timothy has been seeded sow four quarts per acre. See price list.

WHAT IS "DOMESTIC BRAND"?

When we quote "Domestic Brand Clover" it means the highest quality that money can buy, no weeds, no chaff, just pure seeds that have been thoroughly cleaned and carefully tested.

Drifting, Pa., May 18, 1933.

Dear Sirs:—Received order and am very much pleased with the seed.

J. A. Raymond.

Genuine Mammoth Red Clover

MAMMOTH CLOVER, also known as "Pea Vine" and "Sapling," is very much like the Medium. It matures about two weeks later than Medium, and develops a stronger root and top development. It produces less pasture after the crop is cut than Medium, but for restoring land or for general fertilization there is nothing more valuable than Mammoth Clover. It yields a large growth and when turned under will loosen and improve the working of heavy clay soils better than any other crop. There is no difference in the appearance of the seed. We, therefore, handle only such lots as can be obtained from the most reliable sources, direct from sections growing Mammoth almost exclusively. We take the same care in selecting this seed that we do in securing our best grades of other Clovers. We only sell one grade, DOMESTIC BRAND MAMMOTH. Sow about the same rate per acre as the Medium. See price list. Use Stimugerm to insure Bumper Crop.

Mammoth Clover

Choice Red Clover

Choice Medium Clover is found superior to the seed sold by the average dealer. It is in every way equal to the so-called "Best Grades" on the market. This seed will surpass Prime in purity and growth.

Our Choice Medium Clover is Government Verified seed. Tests Better than 99% Pure. Free from noxious weeds. If you are looking for seed at a lower price and yet safe to sow you will find our Choice Clover will fill the bill. There are many best grades sold that will not equal our choice clover in purity and germination. See price list.

White Clover

White or Dutch Clover is a perennial of a creeping nature, and is used mostly in Lawn Mixtures, although it is a valuable addition to Pasture Mixtures, using one to three pounds per acre. Adapted to low meadows where not too wet. On low lands suited to its growth it will last indefinitely, although it may be crowded out by other grasses certain seasons only to reappear the next. Invaluable in Lawn Mixture, imparting a rich green to the lawn, and holding its color with the grasses till after freezing. See price list.

Korean Lespedeza

The earliest of all varieties. Produces more hay and more seed than any other variety. Being the earliest variety it is recommended in the northern states and high altitude. Grows well in the South, but does not produce late pasture in the South. Will produce a crop on acid soils where Red clover and Alfalfa will not produce profitable crop. Sow after May first in the North. Break or disk soil very shallow, dragsmooth, sow seed with any good seeder right on the top then redrag or roll. Sow 35 Lbs. per acre.

Crimson Clover

Crimson Clover is especially valuable as a cover crop and for green manure. In feeding value it is even higher in protein than Red Clover, and makes one of the best Clovers for silage purposes. It is a wonderful producer and is especially relished by all live stock. Crimson Clover has been used extensively as a fertilizer crop, sowing it in the last working of the corn, used as a cover crop during the winter and plowed under in the Spring will grow greatly increased crops.

**INOCULATE THIS
SEED WITH
STIMUGERM**

WHEN TO SOW. Crimson Clover can be sown to advantage any time from beginning of July to October. Land should be well prepared before sowing seed, and not covered too deep. It is one of the cheapest legumes for soil improvement, and will thrive on poor lands and will add fertility. It will pay you to use this seed liberally. Sow 15 pounds of seed per acre. We handle only one grade, highest in purity and germination. It will pay you to inoculate Crimson Clover with Stimugerm. See price list.

Alsike Clover

Alsike Clover

Alsike Clover is increasing in popularity very rapidly. It makes the best combination with Red Clover and Timothy, either for hay or pasture, and grows well on high as well as on low wet soils. It is specially adapted to wet soils and also on soils that are too low in humus to grow Clover. When sown with other grasses it forms a thick bottom and greatly increases the yield, and the quality of the hay is better. When well cured there is no hay more greatly relished by stock of all kinds. Mixed with Clover and Timothy it affords one of the best forage rations, and the three are grown successfully together, the hay from such a mixture being better than either of them alone. The seed is smaller than the red Clover, therefore does not require as much seed per acre. Alsike is hardier than Medium or Mammoth Clover, but lodges more than either, and for this reason it is better to sow it with Clover and Timothy. If sown alone sow eight to ten pounds per acre. Alsike is a perennial, and because of this characteristic is especially valuable for growing on land where one wishes to secure a permanent pasture or meadow. See price list.

**INOCULATE THIS
SEED WITH
STIMUGERM**

For only 20 or 30c per acre you can insure your stand of Clover, Alfalfa, Sweet Clover, Soy Beans, etc. You cannot afford to take chances when the cost is so little. Include Stimugerm in your order without fail. See page 11.

Northwest Alfalfa

Northwest Alfalfa

Alfalfa should be grown on every farm, and now holds an important place in agriculture, especially in sections where dairying is carried on. Adaptable to every State in the Union. Most failures are traceable to low grade or Southern seed. One thing is absolutely essential—begin right. Be sure you use only Northern Grown Seed that will stand the winters.

After Alfalfa is once established it lasts for several years, yielding three to four cuttings every season of the most excellent and nutritious hay, which is readily salable at top prices. We highly recommend Northern Grown Seed, having found it more dependable than Western or Southern Grown Seed. It would hardly be possible to say too much about Alfalfa; it is a working plant which is changing the destiny of many farming sections.

SELECTION OF SEED VERY IMPORTANT

It is very important to use Alfalfa that is of a hardy strain. There is no better proof that a strain is hardy than that it is grown in the Northwest, where the winters are severe and the ground freezes eight feet or more. Alfalfa raised under these conditions must be of the hardiest strains, and will stand the most trying conditions. We have again secured a very choice lot of Genuine Northern Grown Alfalfa, fully matured, as pure as is possible to grow. High in germination, full of seed life, plump and attractive. You can sow no seed that will give better results than our Northern Grown Seed. See price list.

**INOCULATE THIS
SEED WITH
STIMUGERM**

Kansas Alfalfa

We are offering this year Kansas Grown Alfalfa. This is U. S. Verified origin, and you can depend on that it is genuine Kansas Grown seed. It is equal to our Northwest seed in purity and germination. In some sections Kansas Grown Alfalfa seed has been giving satisfactory results. Our seed is bright color and plump. The quality is sure to please you. See price list.

Alfalfa is the farmers' government bond. He clips off the green coupons three or four times, and leaves the original bond intact, indestructible, prolific, the prosperity of any community. It is the symbol of high social and intellectual culture. In communities interspersed with green fields of alfalfa, we find pure-bred stock and well fenced farms with comfortable and beautiful farm buildings.

Alfalfa is the farmers' deep tillage machine that penetrates deeply into the subsoil, admitting air and water, and bringing to the surface stores of plant food from below, that would otherwise remain out of reach of the plow and cultivator.

Alfalfa should be grown on every farm. It surpasses all other crops in yield, in feeding value, as a drought resister and as a builder of the soil. It enhances the value of every farm.

Grimm Alfalfa

Grimm Alfalfa has gained a wide reputation on account of its productiveness, and extra hardiness, for it survived winters that killed out many fields of other varieties of Alfalfa. Grimm Alfalfa was selected from the hardiest plants year after year until it became a fixed type of extreme hardiness and vigor. It differs somewhat from the other varieties in the crown of the plant, being receding, and is therefore protected by the surface of the soil. The roots are also fibrous instead of having only long tap root.

This seed is Northwest grown, and Sealed and Certified by U. S. Department of Agriculture. Plants grown from this seed will endure extreme cold and withstand excessive heat. See price list.

Michigan Grimm Alfalfa

Michigan grown, U. S. Verified Origin, Growers Affidavit, Sealed and Verified Genuine Grimm. Not a second grade. Equally high in purity and germination as our Northwest. Buying this seed you get the benefit of lower freight rate we pay to get seed here. We can furnish this seed at \$12.00 per bushel as long as our present supply lasts. Don't wait. Order now.

Rohrer's Fancy Timothy

Timothy is the most valuable of all grasses. Our Fancy Timothy is guaranteed to be high in purity and germination. We know you will be pleased with this seed. A good stand is easily secured. It is used more extensively than any other of the Grasses or Clovers. Grows rapidly and produces hay that commands the highest market price. Timothy seed is sown with Clover and Alsike and makes very good hay. It is also valuable in pasture mixtures. Timothy Seed is low in price compared with other Clovers, therefore, extreme care should be taken to sow best seed obtainable; highest in purity and germination. When sown alone sow eight quarts per acre. If sown with Clovers sow three to four quarts per acre. See price list.

Sweet Clover

Sweet Clover resembles Alfalfa, both in appearance and habit of growth, when young. Grows larger than Alfalfa. When properly handled Sweet Clover is a valuable addition to the farm crops in many sections. It is efficient as a soil renovator, by reason of the large amount of nitrogen it will be able to take from the air, as well as the humus added to the soil when turned under, for the decay of the roots when it is harvested. No other forage or soiling crop has ever come into such favor as White Blossom Sweet Clover. If it had no other property than its ability to inoculate soil for Alfalfa it would be a worthwhile investment, but in addition to this it is one of the best forage plants, possessing all the feeding qualities of Alfalfa. As a soil builder either for naturally poor soils or those that have been exhausted, no other plant can take its place. Analysis and feeding experiments indicate that it is nearly equal to Alfalfa in feeding value. There is nothing better to bring your worn out land into farmable condition. To

**INOCULATE THIS
SEED WITH
STIMUGERM**

get full value out of your Sweet Clover inoculate with STIMUGERM. See price list.

Grundy Sweet Clover

This strain is now becoming popular in the East. It is Biennial and white blossom. Does not grow as tall as the regular strain of white blossom sweet clover. Is about two weeks earlier and makes finer hay.

TIMOTHY AND ALSIKE

This seed is grown and harvested together and is sold for less than you can buy the seed separate. Our seed is *re-cleaned* and runs 20 per cent Alsike. These two crops are well suited for growing together and will thrive on any land located anywhere within the clover belt, for although this crop reaches its highest state of perfection on moist low land it can be grown anywhere with good results and makes good hay. About 12 to 16 lbs. per acre is required. A trial of this mixture will add to your profits. See price list.

Permanent Pasture Mixture

Good pasture is the foundation of the riches of a farm. One of the most valuable crops of successful stock and dairy farming is abundant pasture. Our mixture yields a very heavy crop of the finest and most succulent grasses early in the season until late in the fall, and is intended especially for seeding pasture grounds. Several varieties are used in this mixture, a combination of grasses of different habits and seasons of growth and can be depended upon to produce a turf that will stand the trampling of stock, and as the different grasses have different habits of growth they grow close together, their roots inter-

lacing, covering the soil and forming a protection from the extreme heat, cold and dry weather. This enables the grasses to retain a rich green appearance from early Spring to late Fall. These mixtures are recommended for either Spring or Fall sowing. If sown in the Spring sow with a nurse crop. About one bushel of Oats or Barley per acre is very desirable.

Two mixtures are made: One for well-drained up-land, called Highland Mixture, and the other for lowland meadows, which is called Lowland Mixture. Sow 25 to 30 pounds per acre. See price list.

Special Hay and Pasture Mixture

For ordinary Spring seeding this mixture cannot be beaten. The proportion is approximately six pounds Red Clover, three pounds Timothy, two pounds Alsike and one pound Alfalfa. Sow 12 to 15 pounds per acre on well prepared seed bed. Having it so mixed saves extra bags, extra weighing, and extra profits, sampling, etc., and positively cheaper to you than if you bought each separately. None but the best seeds are used in this mixture, and it is suited to nearly all soils, and will grow in

every section. This mixture should be used very extensively for either hay, pasture or soiling purposes. When seeding Timothy in the Spring always use Red and Alsike for best results. This mixture, we believe, will meet with your approval and be a money saver. It reduces the cost of your seeding and is an excellent grass combination for hay. We mix this seed, and positively none but best grades are used. This insures you a mixture that is free of noxious weeds. See price list.

Kentucky Blue Grass

Kentucky Blue Grass may be sown Spring or Fall. One of the best grasses for pasture mixtures, has many advantages for general purposes and is extremely hardy and stands severest droughts. Comes on early in Spring and grows late in Fall. We recommend it as the grass every stock raiser wants. Fine for pasture as it forms a tough, closely knit sod that is not injured, but benefited, by trampling of grazing animals. It requires a good soil containing some lime to yield profitable crops. When sown alone, sow 35 to 40 pounds per acre. See price list.

Orchard Grass

Orchard Grass makes a desirable grass on account of its quick growth, and valuable aftermath. It starts growing earlier in the Spring and stands dry weather better than any other grass. We would recommend it mostly for pasture, and more especially when sown alone. If you have never grown Orchard Grass, try a little this year. It will last for years without the necessity of resowing. May be sown either Spring or Fall on any kind of soil. About two bushels per acre is required. See price list.

Cahoon Seed Sower

Buy the Famous Cahoon Seed Sower by Parcel Post.

The Cahoon is scientifically constructed to scatter the seed evenly in front of the operator. This sower has been in use all over the world, and has been proven to be the simplest, most accurate, and durable sower made. It is made entirely of all steel, iron, brass, and heavy canvas, and sows grain or grass seeds. Needed on every farm. Even seeding brings good reaping. Order today. Satisfaction guaranteed. \$4.50 postpaid to you.

Englishtown, N. J., July 2, 1933.
Mr. Clayton Palmer writes, I have the best field of Oats in Monmouth County, from your seed.

Lawn Grass

Our Fancy Lawn Mixture is composed of the very best grades of seed. This seed makes a quick growth and covers the ground in a few weeks after sowing the seed, forming a rich green turf. Can be sown either Spring or Fall. For best results Spring sowing is most favorable. One pound seed will sow 200 square feet of ground. Seed should be raked in slightly, and after seeding soil should be pressed down firmly. Seed should be covered one-fourth to one-half inch. See price list.

Result of our Fancy Lawn Grass Mixture

Red Top

This is a valuable grass for either hay or pasture. It ranks second to Timothy in production of hay and makes excellent pasture and good crops of fine hay. It is valuable for seeding alone or to seed along with Timothy, Clover and other grasses. Can be sown in Spring or Fall. It succeeds better and is adapted to a

wider range of soils than any other grasses. It is hardy and will make a heavy sod, and it should be a large constituent part of all mixtures intended for permanent pasture. If sown alone use 10 to 12 pounds of hulled or solid seed. We handle the solid seed and do not recommend sowing the unhulled seed. See price list.

Swedish Select Seed Oats

Considered by many to be the most valuable Oats raised in the Northwest today. An extremely productive variety with tall, stiff straw, bearing long heads filled with good weight grains. It possesses striking features, the grain is short, plump, white and heavy, under favorable conditions averaging 40 to 42 pounds per measured bushel. Owing to the great root development it stands very high and is noted for its drought resisting qualities. Those who prefer a white Oats for spring seeding will make no mistake in sowing Swedish Select. Our seed was grown in the Northwest. Our experience has proven to us that all kinds of seeds grown in the Northwest are hardier, more vigorous and more productive than Southern or Western Seed. This is particularly true of Seed Oats. Try our Northern Grown seed this year and grow a Bumper Crop. See price list.

BARLEY

BEARDED BARLEY. Barley should be grown more than it is. It will do well in most any section of any state. It is also one of the best grains for a nurse crop for Alfalfa when started in the spring. Barley culture is similar to that of Spring Wheat or Oats. To produce large crops of Barley the soil should be well prepared to receive the seed. It is heavier than Oats and will yield more bushels per acre. It is a splendid feed. Barley should be sown as early as Oats, if possible, but will stand late planting better than Oats. Sow about two bushels per acre. See price list.

Danielsville, Pa., March, 1933.

I was well pleased with the seeds I received from you last year, especially the Alfalfa seed. I found it quite clean from weeds and good germination. Enclosed is order and check for Field and Garden Seeds.

J. B. Glase

For the most luscious of beets order the "New Century." As sweet and tender next spring as the day you dig them. Order a quantity.

Maine-Grown Seed Potatoes

Plant Guaranteed Stocks—It Will Increase Your Profits

**FOR PRICES ON SEED POTATOES, SEE PRICE LIST. FREIGHT PAID OFFER
DOES NOT APPLY ON SEED POTATOES**

Our stocks of Maine-Grown Seed Potatoes were grown especially for seed by most reliable seed growers in Aroostook County, Maine, and shipped to us in carload lots. All seed carefully selected, and will produce much larger yields, and Potatoes of a finer quality than the home-grown stocks usually sold on the open market for seed. All seed guaranteed to please purchaser and sold on the Money-Back plan. If not satisfactory Potatoes may be returned and money will be refunded.

EARLY SURPRISE. This variety is without doubt the earliest white potato in existence. It is round to oval in shape, flesh is white and firm, and far more productive than most early potatoes. If you want first early potatoes you will not go wrong in planting this variety.

IRISH COBBLER. An early white-skinned variety, very short, thick and inclined to be shaped round. This variety is yearly increasing in popularity for early markets. The crop is ready about 10 days earlier than Early Rose. The vines are very stocky, vigorous, and not as liable to be affected with blight or suffer drought as most other varieties. Owing to the fact that the Cobbler withstood the severe drought last season better than other varieties, it is probable that there will be a larger demand than usual this season. We advise ordering early.

EARLY ROSE. The stock we offer is the genuine Old Standard Early Rose, pure and true-to-name. While this is one of the oldest varieties it still retains its popularity. You will not go wrong in planting a quantity of this sort.

Irish Cobblers

RUSSETS. One of the best for main crop cultivation. Similar to the Raleigh in shape of tuber but has a russet skin and few eyes. This is a very hardy sort and usually produces good yields even when seasons are unfavorable. Vines grow vigorous, have fine blight resisting qualities and usually remain green until late in fall. This variety outyielded other varieties two to one in many sections last season, planted side by side. The stock we offer this season are Certified Maine grown.

EARLY OHIO. A sort that is well known to market gardeners. The tubers are round with pink skin and excellent quality. Grows quickly, cooks mealy and keeps well for an extremely early variety. Our stocks are true-to-name and will please you.

VERMONT GOLD COIN. This is a very popular main crop sort. We have found it to be a very desirable and profitable potato to grow. Vines are very heavy in growth and seldom known to blight. Tubers are large, white and lie close together in the hill. The flesh is fine grained and excellent for table use, retaining its fine eating qualities until late in spring. You will be highly repaid if you give this variety a trial.

IMPROVED GREEN MOUNTAINS. This variety has proved to be the surest cropper, a most profitable sort to grow. The skin is pure white, slightly netted. The quality is one of the best. Keeps excellently and its fine table qualities make it one of the foremost sorts in the large City markets. Shippers prefer this variety and frequently pay a premium. Best for loose and muck soils, and especially adapted for Northern states. Plant this variety and increase your profits.

Treat Seed Potatoes with Semesan Bel. One Pound of the New Improved Semesan Bel will treat 60 to 70 Bushels. A convenient and effective method of treating Seed Potatoes. Simply to mix, dip and drain, dry your seed and they are ready for planting. See page 29. Descriptive booklet sent free on request.

BLUE VICTOR. We have a very limited amount of Certified Blue Victor Seed Potatoes this year. This is a round, late variety. Flesh is snow white, superior cooker, and one of the best keepers for late spring. The Skin is blue. We cannot get any more after our first supply is sold. Don't wait if you want any Blue Victors. See price list.

BLISS TRIUMPH. This season we will be able to supply Certified Bliss Triumphs. Maine Grown. This is an early variety, deep red, round, very smooth and a fine quality cooker. This variety is planted extensively in the south.

**Spray
This Crop
with
Pyrox**

Improved Leaming

One of the most desirable standard varieties of yellow corn. Stalks are good height, very leafy, broad blades, making splendid silage or fodder corn. Ears are well filled out averaging about ten inches in length, color beautiful golden yellow. Being a medium early sort it will mature earlier than Rieds Yellow Dent.

Bountiful Yellow Dent

This is one of the most profitable varieties to grow, and is very popular in this part of Pennsylvania. It matures in 105 days, or about 10 days later than Improved Leaming. Because of its great root development it will withstand more drought throughout the season than any other variety. It is an exceptionally strong, robust grower, and is considered one of the best varieties in cultivation where the season is not too short. We do not recommend it in the extreme northern part of Penna. and N. Y. State. The ears attain an immense size, and because of its medium sized cob makes it a profitable Corn to shell. One bushel shelled corn will plant eight acres. See price list.

Bountiful Yellow Dent

Rohrer's 90- Day Yellow Dent

This is the earliest variety listed. It is a splendid golden yellow, beautiful colored Yellow Dent Corn. The ears grow to a fairly good size, 7 to 9 inches long, with 16 to 18 rows per cob. On a beautiful red cob. Its grains are of good length, and the fodder grows 8 to 11 feet high. Where the season is short you will find this variety profitable to grow. See price list.

Lancaster County Sure Crop Corn

Lancaster County Sure Crop

This is one of the best varieties for cribbing as well as a silage Corn. It is recommended very highly by many Farm Bureau Agents, and some of the best Dairy Farmers grow this corn exclusively for ensilage. The fodder is very tall and leafy. It withstands drought and develops ears early. The ears are very long, but not very thick. The grains are filled out well at both ends; the cob is very thin and therefore shells very easily. Lancaster County Sure Crop contains more protein than any other Corn we know. It is a sure cropper and will mature in any part of Penna. and Ohio. See price list.

Red Cob Ensilage

A long narrow white grain and is sold as a special Ensilage Corn. Grows tall and is prolific in leaves. In the North where the season is short the corn will not fully mature. We can recommend this variety where the season is not too short. We furnish a fine quality seed. All our Seed Corn germinates 90% or better. See price list.

Eureka Ensilage

The largest growing ensilage corn in existence, is grown in Virginia. This is a white corn and has very large flat, square kernels. Matures late. Believe Eureka Ensilage will grow more tonnage per acre than any other variety grown.

Marquis Spring Wheat

Marquis Spring Wheat is undoubtedly the heaviest yielding type in existence today, and anyone needing Spring Wheat will certainly do well to order this splendid variety. Remarkably early, productive, unexcelled in milling qualities.

Protect your Seed Corn. Use Stanleys Crow Repellent. 1 bu. size, 60c; 2 bu. size, \$1.00; 4 Bu. Size \$1.75.

Heavyweight Sure Crop

ATTENTION, FARMERS! Here is just the type of corn you've been wanting for years. A type which combines all the good qualities of both our Yellow Dent and Sure Crop varieties, and eliminates the poor qualities of each. This corn, developed in the eastern section of our rich Garden Spot County, has increased rapidly in demand among local farmers, and now after several very successful years of growth we are assured it is just the type a great many farmers are seeking.

It matures about as early as our famous Lancaster County Sure Crop and grows just about as tall. It ears very close to the ground, a factor which holds it erect throughout the season, and frequently one stalk will produce two large ears. It produces a very close grained, compact, full ear, oftentimes reaching 12 inches in length and from 2 to 2½ inches in diameter with but a very thin cob. The grains are deep and broad and have a light cap, giving the ear a light yellow color.

With these qualities combined there is not another variety grown that will give you as much good, solid corn as this newest of all varieties. Be sure to try several acres this year and you will never want anything else. See price list.

Millets

GOLDEN MILLET, also known as *German Millet*, is the best for hay or fodder. When cut in full bloom the quality is exceptionally good and all kinds of stock relish it. On good soil a yield as high as five tons per acre may be expected. Sow 35 pounds per acre. See price list.

JAPANESE MILLET (*Billion Dollar Grass*). The best soil on which to grow this Millet is that which is in fair condition of fertility and inclined to be wet rather than dry. Japanese Millet is adapted to all seasons. It will grow six to eight feet high. It is excellent for silage. It is fully equal to the best corn fodder as a food for milch cows. The seed may be sown broadcast at the rate of 20 to 25 pounds per acre. This variety stools remarkably and should not be sown too thick. See price list.

Dwarf Essex Rape

This plant is a valuable forage crop. One acre of it will pasture more hogs, sheep and cattle than four acres of Clovers or other grasses. As a healthy fattening pasture food it has no equal. It is an annual, producing large leaves, and can be sown any time from early Spring until September, and is ready for pasture 6 to 8 weeks after sowing. It stands out without a rival for cheapness and effectiveness. Sow four to five pounds per acre, broadcast. See price list.

Ida Runkles of Mt. Airy, Md. writes us that she finds the New Century Beet very tender and fine for canning. Better order some for yourself. You'll like them, too.

Sand or Hardy Vetch

Also known as Winter Vetch. It is a rapid grower and thrives on little moisture. It is a winter annual and can be sown Spring or Fall. Stays green all winter furnishing an abundance of pasture until early Spring to late in Fall. It is a tremendous yielder, producing 15 to 20 tons green forage per acre. As a fertilizer it has few equals, as it grows on poor soils exceedingly well, and a crop of vetch plowed under is claimed to be equal to \$20 to \$40 worth of Commercial Fertilizer. Sow about 40 pounds Vetch and about one-half bushel of Oats or Barley. The grain sown with Vetch will act as a support for the vines. Vetch should be inoculated with Stimulerm for best results. See price list.

Buckwheat

Buckwheat can be planted from June 1st to middle of July and is used much by farmers having vacant land upon which they were unable to get planted an earlier crop, or upon land where another crop has failed. Buckwheat does well on poor soil and makes one of the best fertilizer crops to turn under. A small patch planted near the poultry yard can be harvested by the chickens. Sow one bushel per acre.

JAPANESE. This is the standard and most popular variety of Buckwheat, and ripens a week earlier than the Silver Hull. It is the most productive and prolific variety in cultivation. It resists drought and blight well. See price list.

Sudan Grass

Sudan Grass is a tall grass, which grows from four to seven feet high. The stems are small and leafy. It is like the Sorghum or Millets, and must be started each Spring. It is easily cured for hay and stock will eat it readily. May be cut from two to four times in one year. The crop should be cut for hay as soon as the grass is full headed, and early cutting is advised when the crop is to be used for hay. See price list.

Soy Beans

Wilsons' Soy Beans

WILSONS'. This is the most popular variety in cultivation. This is an early sort that will mature seed in Penna., Ohio and N. J. On account abundant growth of slender stems and branches the Wilson makes the best sort to grow for Hay. This is also an excellent sort to grow for seed and ensilage. Will do well on poor soils and produce a large crop of beans, but we would recommend good soil for hay, forage, soiling, silage or green manure. See price list.

The Soy Bean is a crop of interest to all classes of farmers, and is bound to establish itself as one of the most valuable additions to American agriculture. No crop has gained popularity as rapidly as Soy Beans. On land too poor to grow Clovers, Soy Beans and Cow Peas can be made to produce great quantities of feed and will increase the fertility while doing it. Soy Beans should not be planted until the ground is warm. About ten days after corn planting would be safe. Soil should be well prepared, just the same as you would for corn. Seed should be covered about one and one-half inch deep. Can be sown broadcast or drilled in. When drilled with grain drill sow one and one-fourth bu. per acre. Broadcast will require one and one-half bushels per acre. Sowing them in rows of 24 to 32 inches apart and two to three inches in the row will save seed and you will be able to cultivate your crop. Cultivate it as often as you would Corn. This method of planting will require 20 to 30 pounds per acre, depending on the width of the rows.

The growing of Soy Beans has long since passed the experimental stage. Their adaptation to all parts of the country, and their value and place in agriculture apparently surpassing all other legumes, has been determined. Their high feeding value and their usefulness as soil improver makes them valuable additions to our list of field crops.

MAMMOTH YELLOW. This is a medium maturing variety. Will not mature seed in Pennsylvania and Ohio. Will grow on barren soil that does not have sufficient fertility to grow other plants. Planted largely as ensilage with corn, or for forage and turned under for soil improvement. Not such a good variety for hay, grows very tall, and is coarser in texture than Wilson. Will make more growth, and more bulk for silage than any other variety. See price list.

MANCHU. This variety has been very popular in Penna. and Ohio. It is a general all purpose Bean, and has few rivals. Can be used for Hay, and a good variety for hogging down. Does not shell out easily. A good Yields for seed purposes. Grows Tall, erect and bushy. Matures Beans in about 110 days in a normal season. See price list.

Canada Field Peas

The demand for Canada Field Peas increases every year. It is used both as a green feed and as a fertilizer and the amount of feed produced per acre is very large. Valuable feed for hay or soiling. It is readily eaten by all kinds of stock, and is as nourishing as can be desired. It ranks very high as a fertilizer, either when plowed under or pastured off. We would advise every farmer to use Field Peas more liberally than many of them have been doing in the past, knowing that they will be pleased with the results. Canada Field Peas are mostly sown with Oats. When growing they furnish the nitrogen so much needed by all soils. As a forage for dairy cows and hogs they stand in the front ranks. There is no crop that we can so heartily recommend. They are perfectly hardy and will do on any soil adapted to Oats or Wheat. Canada Field Peas are most profitable when sown with Oats. The Oats will support the vines, and lessen trouble to harvest. Sow $1\frac{1}{2}$ bushels of Peas per acre, and about the same amount of Oats. Peas should be drilled first about $3\frac{1}{2}$ inches deep and the Oats sown 2 inches deep. See price list.

**INOCULATE
THIS SEED WITH
STIMUGERM**

It will pay you to inoculate your Peas with Stimugerm. Great quantities of Stimugerm are used each season to inoculate the seed for Canada Field Peas.

Tobacco Seed

Lancaster County Red Rose

Seed Leaf Type. Best for size, weight and quality. Does not easily shoot in dry weather. Fewer suckers than other varieties. Stands up well and is a profitable sort to grow.

Sprout seed and sow in hot bed early in April. Plants, when developed, should be transplanted in rows about 32 inches apart and 24 inches on the row.

$\frac{1}{2}$ ounce will sow 200 to 250 square feet.

By mail, postpaid, $\frac{1}{2}$ oz., 40c; oz., 75c.

PROTECT YOUR LEGUME CROPS — INOCULATE WITH

The finest kind of crop insurance at low cost.

Seeds of all legumes—Clovers, Alfalfa, Sweet Clovers, Beans, Peas, Vetches, Soy Beans, Cow Peas, etc.—will yield far better results if inoculated with STIMUGERM, and, in addition leave in the soil a heavy deposit of nitrogen which benefits all succeeding crops in the rotation.

A Sensible Insurance and a Profitable Investment

STIMUGERM is a pure culture of nitrogen-fixing bacteria selected for maximum vitality and ability to transform the nitrogen from the air into soluble nitrates and deposit them in the soil.

We believe in inoculation, we favor the pure jelly medium, and we believe in STIMUGERM. Of all the inoculants manufactured we believe it is the most effective and cheapest, consistent with high quality. Farmers who have used it will never again seed without it—even where the legumes have been grown before, because it is easier to make Better Best than Bad Good.

Full directions go with each bottle—easily applied—takes but a little time.

WHAT

STIMUGERM
LEGUME INOCULATION

WILL DO

STIMUGERM will reduce your fertilizer bills, give you larger crops, and improve your soil by producing nodules on the roots of legumes, as shown in the illustration above. No other inoculant is as strong and virile. No other inoculant will give the profusion of nodules.

When ordering, be sure to state what crops you wish to inoculate.

STIMUGERM is so inexpensive and is so effective an insurance that you cannot afford to sow legume crops without it.

The Advantages of Ordering Early

The folks who order their seeds early obtain the benefit of larger varieties and better prices. As the season progresses the varieties are fewer and we must pay higher prices on late shipments. Buy as early as possible and have the seed ready when you are ready to sow. And remember: **You** must be satisfied with every seed purchase made from this catalog. If it isn't as high a

quality or higher than we represent it—send it back and your money will be refunded promptly.

Free Postage on Garden Seed

We pay the postage on all garden seeds anywhere in the United States at prices quoted in the catalog, except where prices marked, Not Prepaid. Onion Sets in larger quantities than quoted are F. O. B. Smoketown. Freight or express collect. **See price list.**

ASPARAGUS

MARY WASHINGTON. This is a highly rust-resistant variety of Giant Asparagus. Makes rapid growth, is very tender, which makes it the best of all for market value. Mary Washington is without doubt the best strain known. **Seed, by mail, postpaid, pkt., 10c; oz., 15c; ¼ lb., 40c; ½ lb., 75c; lb., \$1.25; 5 lbs., \$5.50.**

BEANS

BURPEE'S STRINGLESS GREEN POD. This

old variety is steadily growing in popularity, because of its hardiness. The rich green pods are almost round, and mealy. Absolutely stringless, even after fully matured. It is tender and of delicious flavor, and should have a place in every garden. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.00.**

Burpee's Stringless Green Pod

BOUNTIFUL. One of the first in bearing and yields for a long period. An especially good bean for the market or home garden. It is generally considered to be one of the best flat green podded bush beans. Pods are large, solid and stringless, retaining tenderness even when past maturity. Most popular early variety. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.00.**

RED KIDNEY. A standard old variety that is very popular. It is grown almost exclusively for the dried beans, which are long, oval and purplish in color. The plant is dwarf. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.10.**

WHITE MARROW. A dwarf variety that is largely planted and used both as a string and shell bean. A profitable sort for market gardeners to grow, and a necessary one for the home garden. The dried beans are large and white, oval in shape. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.10; 10 lbs., \$1.75.**

WHITE NAVY. Also called Pea Bean. A good sort for either market or home use. It is smaller than the White Marrow, but is of fine flavor and is the variety used in making the famous "Boston Baked Beans." Very productive and is largely planted everywhere. Dry Beans small and pure white. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.10; 10 lbs., \$1.75.**

*Samples to prove the finer quality of Rohrer's Farm Seeds are sent FREE on request.
You'll see the difference.*

Yellow or Wax Podded Varieties

Yellow Pod Bountiful

ROHRER'S YELLOW POD BOUNTIFUL BEAN. The Yellow Pod Bountiful Bean is the earliest of all Yellow Beans and absolutely stringless. The pods are long, thick and very meaty. It is the best of all Yellow Beans. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.00.

PENCIL POD or BLACK WAX. Pods round, meaty and stringless. A fine bean for the home garden and for home canning. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.00.

IMPROVED GOLDEN WAX. Rust proof, a great improvement over the old Golden Wax. Pods 4 to 5 inches long, golden yellow, very fleshy, and one of the best beans to use either as a snap or shelled. Ready for picking 45 days from planting. Improved Golden Wax, in our judgment, is the best from every standpoint. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.00.

BURPEE'S BRITTLE WAX or ROUND POD KIDNEY WAX. This is probably the earliest of Wax Beans. The pods are round, fleshy, brittle and stringless. In quality it is among the very best. It is extremely early and very productive, making it a favorite everywhere. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.00.

Pole or Cornfield Beans

KENTUCKY WONDER. The most popular and generally grown of all Pole Beans. A continuous bearer and almost rust proof. The long pods are stringless, crisp and tender. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.20.

SCOTIA or STRIPED CREASEBACK. One of the very best string Beans. Very tender and delicious. Can very easily be planted in corn. Pods are long, perfectly round, entirely stringless and of the highest quality. They have a rich melting flavor. They commence to bear as soon as the early Bush Beans are gone. Be sure to include some of this variety with your order. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.25.

GOLDEN CLUSTER WAX. An extra strong grower and very productive. The flat stringless pods are large, 7 to 8 inches long, and three-fourths inch wide, and are borne in clusters. Rich golden yellow of excellent flavor, and remain fit for use for a long time. Vines bear continuously. One of the best yellow podded Pole Beans. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.25.

LAZY WIFE. The best late green podded Pole Bean. An extremely heavy yielder of broad, thick, fleshy, dark green pods, which are entirely stringless, averaging 6 inches long. The dry beans are excellent for winter use. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.00.

Bush Lima Beans

Fordhook Bush Lima

FORDHOOK LIMA. The bush is of erect growth, holding the pods off the ground, so that they are not injured by wind and rain. Very prolific. Pods contain four or five large flat Beans and are very easily shelled. The green Beans, when full size, are tender, juicy and sweet. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50; 10 lbs., \$2.75.

BURPEE'S BUSH LIMA. A good standard variety that grows about 18 inches high. Pods average six inches long and 1¼ inches wide. Pods are borne in clusters of five to eight. The pods are well filled with very large beans, identical in size and luscious in flavor as the large white Pole Lima. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.15; 10 lbs., \$2.25.

Protect your flowers from all insects. Use Sheps Plant Spray. Non Poisonous. See page 28.

Pole Lima Beans

POLE LIMA—KING OF THE GARDEN. A vigorous grower, producing an abundance of large dark green pods which frequently contain five or six large Beans of the most excellent quality. The best of all Pole Limas. Dry beans are large and flat. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.25; 10 lbs., \$2.25.

IMPROVED CHALLENGER. Also known as Potato Lima. Very early and produces large clusters until frost. Beans are thick, fleshy, cook mealy, and very delicious. About same shape and size as Fordhook. Shells out more beans than any other pole lima. Cannot be excelled for home and market garden. By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.25; 10 lbs., \$2.25.

Beets

CROSBY'S EGYPTIAN. An extra quick grower. Suitable for forcing or growing outdoors. Smooth turnip shaped. Roots averaging two inches in diameter. Beets are tender and of good flavor. By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 90c.

Detroit
Dark Red

DETROIT DARK RED.

An ideal beet for home and market garden. The roots are globe shaped, dark red and uniformly smooth. When young the flesh is almost black-red, turning to dark crimson. They are an appetizing dark red when cooked and are very sweet. Every garden should contain some of these delicious beets. By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 90c.

ROHRER'S NEW CENTURY BEET. If you want a beet that will stay tender and sweet all summer and winter, plant the New Century Beet. The best table beet we have ever eaten. Large or small they are tasty and tender. This beet is very deep red and tops are green. By mail, postpaid, pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; lb., \$1.50.

EARLY BLOOD TURNIP. A fine early strain good for summer and autumn use. The dark red roots are very sweet and tender, with a fine flavor. By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 90c.

Stock Beets or Mangels

MAMMOTH LONG RED. This is a particularly good variety, having long roots, 5 to 6 inches in diameter. The skin is bright red and the flesh white with veined rings of rose pink. Enormously productive. By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 20c; lb., 50c; 5 lbs., \$2.25; 10 lbs., \$4.00.

GOLDEN TANKARD. A heavy cropper on good land and easily harvested. The large sweet yellow roots are much relished by stock. One of the best of the Mangels. By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 20c; lb., 50c; 5 lbs., \$2.25; 10 lbs., \$4.00.

Cabbage

COPENHAGEN MARKET. The earliest round head Cabbage we know of. As early as Wakefield and has larger heads. Heads are uniform, practically every plant making a good firm head. It is a vigorous grower and keeps well. Stands longer in field without bursting. By mail, postpaid, pkt., 5c; oz., 25c; ¼ lb., 60c; lb., \$2.25.

EARLY JERSEY WAKEFIELD. Wakefield cabbage is grown in nearly every garden and among the market growers it is planted almost entirely for first early. Pointed heads of good size, very uniform and compact. By mail, postpaid, pkt., 5c; oz., 20c; ¼ lb., 50c; lb., \$1.75.

Golden Acre

GOLDEN ACRE CABBAGE. The Earliest Heading Cabbage in cultivation. Heads are solid, good size, delicious flavor, tender and productive. Very hardy permitting earliest planting. We recommend Golden Acre Cabbage to the Market Gardener and private planter. By mail, postpaid, pkt., 10c; oz., 30c; ¼ lb., 75c; lb., \$2.50.

LATE FLAT DUTCH. One of the best known cabbages and one of the most reliable. It produces immense heads of excellent quality which keeps well all winter. By mail, postpaid, pkt., 5c; oz., 20c; ¼ lb., 50c; lb., \$1.75.

SUCCESSION. Especially recommended for its uniform size, shape and reliability for heading. Makes a deep, flat head, solid and uniform in color. Its tenderness is unsurpassed. Can be grown for fall or winter use. By mail, postpaid, pkt., 5c; oz., 20c; ¼ lb., 50c; lb., \$1.75.

*If you eat one of the new Rohrer Musk Melons you'll wish you had ordered more than you did.
Add a quantity to your order.*

Cabbage (continued)

PENN STATE BALLHEAD (Short Stem). A very desirable late variety developed by Prof. C. E. Myers at the Pennsylvania Agricultural Experiment Station. Test made, on a measured acre, at the Experiment Station, produced 23.76 tons of marketable heads. This is the heaviest producing strain of Danish Ballhead. The heads are round, solid, uniform, heavy and of good quality. Splendid winter keeper. **By mail, postpaid, pkt., 10c; oz., 40c; ¼ lb., \$1.25; lb., \$4.50.**

HOUSER. The largest hard heading cabbage grown. Best winter keeper. Small heart with fine ribs. Grows vigorously and resists drought well. Requires a week or two longer to mature than other late sorts. Fine quality and profitable to grow. **By mail, postpaid, pkt., 10c; oz., 30c; ¼ lb., 75c; lb., \$2.50.**

DANISH BALLHEAD (Short Stem). This is the most popular Winter Cabbage known. The heads are nearly round, very solid, well flavored and firm grained making it the best variety for winter use. Its fine quality causes it to be more largely planted than any other variety. **By mail, postpaid, pkt., 5c; oz., 20c; ¼ lb., 60c; lb., \$2.00.**

GLORY OF ENKHUIZEN. The round ball-like heads are produced as early as "All Season." Heads are of medium size, weighing 6 to 8 pounds when trimmed. Very solid, with few outer leaves, permitting close planting. Keeps well in winter. Very tender and fine flavored. **By mail, postpaid, pkt., 5c; oz., 25c; ¼ lb., 60c; lb., \$2.00.**

AMERICAN SAVOY. The best all around Savoy Cabbage. Heads are large in size and extremely solid. **By mail, postpaid, pkt., 5c; oz., 25c; ¼ lb., 60c; lb., \$2.00.**

Celery

GOLDEN SELF BLANCHING. A very good self blanching celery. It is a vigorous compact grower with straight, rich, golden yellow stalks of excellent quality, being remarkably crisp, tender and free from stringiness. Our American seed is of the highest quality and the best that can be obtained. **By mail, postpaid, pkt., 5c; oz., 40c; ¼ lb., \$1.25; lb., \$4.50.**

EASY BLANCHING CELERY. Slightly taller than Golden Self Blanching, and about two weeks later. A favorite variety with market gardeners. Very crisp and thick. **By mail, postpaid, pkt., 5c; oz., 40c; ¼ lb., \$1.25; lb., \$4.50.**

GIANT PASCAL. One of the finest of the fall and winter sorts. The stalks are very thick, large, solid and crisp, with a delicious nutty flavor free from bitterness. **By mail, postpaid, pkt., 5c; oz., 20c; ¼ lb., 70c; lb., \$2.25.**

GOLDEN PLUME. A large early celery of superior quality and appearance. Blanches quickly with a full heart of rich golden yellow color. Very resistant to blight and rot. One of the finest celeries introduced. **By mail, postpaid, pkt., 10c; ¼ oz., 20c; oz., 60c; ¼ lb., \$2.00; lb., \$6.50.**

HOUSER CELERY. One of the best varieties for home use or for market, with its sweet, luscious, rich, nutty flavor. When bleached it becomes a beautiful creamy white, full of hearts and every stem of it to the outside is delicious. Keeps well in winter. **By mail, postpaid, pkt., 5c; oz., 40c; ¼ lb., \$1.25; lb., \$4.75.**

BURPEE'S FORDHOOK. The largest, most solid and finest nut flavored Celery in existence. Introduced by Burpee in 1915. The quality became known to celery growers a few years after introduction. Grows compact and is easily blanched. It is unsurpassed in every respect, and commands a higher market price than any other variety. **By mail, postpaid, pkt., 5c; oz., 25c; ¼ lb., 90c; lb., \$3.25.**

SOW GOOD SEED—We want to number you among our customers for Celery Seed. It is our desire to furnish the very best quality seed at a moderate price.

Carrots

Danvers Half Long

DANVERS HALF LONG. One of the most productive and is adapted to all soils. The roots grow from seven to eight inches long. This variety is valuable for stock feeding as well as for market. Very high yields. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 90c.**

CHANTENAY. The most popular Carrot for table and market. The roots average five inches in length. The flesh is tender, fine grained, free from hard core, and deep orange in color. A very choice early variety. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 80c.**

Burpee's Fordhook

Cauliflower

CULTURE. For earliest Cauliflower plant seed in greenhouse or boxes in the house in February. Transplant in cold frames or flats, two to three inches apart. Set in open ground as soon as land can be prepared. For late Cauliflower plant in open ground like cabbage.

SNOWBALL. There is no better Cauliflower than the Snowball variety, and our strain is as fine as can be had at any price. The seed we offer is our own, direct importation from most noted grower in Holland. It is the best the world affords, and quality considered our prices are very reasonable. It is not the earliest to be had, but a remarkably sure header, making large, solid, perfect, pure white heads of the finest quality. We recommend it also for late summer and fall planting. **By mail, postpaid, pkt., 15c; ¼ oz., 40c; ½ oz., 75c; oz., \$1.25; ¼ lb., \$4.50; lb., \$17.00.**

Cucumber

DAVIS PERFECT. A very vigorous grower, producing an abundance of fine textured, excellent flavored fruits, seven to nine inches long and seven inches in circumference in the middle. The spine is dark rich green and the flesh is fine for slicing. The fruits are very handsome and regular in shape. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 95c.**

IMPROVED WHITE SPINE. A very good table variety, because of its light green color, which it retains a long time after being pickled. The fruits are nearly cylindrical in form, slightly pointed at the ends. Light green with white spines, very smooth. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 95c.**

EARLY GREEN CLUSTER. A splendid fruited variety that makes excellent pickles. The vines are very prolific, frequently bearing the fruit in clusters of two and three. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 95c.**

Chicago Pickling

CHICAGO PICKLING. Very prolific and profitable sort for pickles. Very uniform, productive, and excellent for pickling. Fruit straight, square ended, and is medium deep green color. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 90c.**

IMPROVED LONG GREEN. One of the best pickling sorts. The vines are very productive of uniform dark green fruits, which are tender, crisp, and of fine flavor. A great favorite with the market gardener. Very heavy yielder. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 95c.**

WEST INDIA GHERKIN. Short prickly fruit grown extensively for pickling. Tender and crisp when young. Produces large crops of small fruits measuring 2 to 3 inches in length and about 1½ inches thick. Very prolific. **By mail, postpaid, pkt., 5c; oz., 15c; ¼ lb., 45c; lb., \$1.50**

Snowball Cauliflower

CLARKS SPECIAL. One of the best varieties for the critical trade. First, it is a good shipper and will hold its color and firmness over long distances. Second, it has a very attractive green color, being one of the darkest green cucumbers that we know on the market today. Third, it is uniform in length, running from 8 to 10 inches, and smooth in appearance having very few white spines. On account of its small seed pockets it is excellent for slicing. **Prices, postpaid, pkt., 5c; oz., 10c; ¼ lb., 30c; lb., \$1.00.**

EVERBEARING. Extremely prolific. Continues to bear throughout the season, and cannot be excelled for large yield. Fruits are dark green, thick in flesh, crisp and tender, average 6 to 7 inches in length. Popular with Market Gardeners. Excellent for pickling and slicing. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 95c.**

EARLY FORTUNE. The finest type of White Spine introduced. Early, very productive and disease resistant. Flesh white. Fruits nine inches long, slightly tapering. Very firm and crisp. Color rich dark green which does not fade when shipped a long distance. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 95c.**

Egg Plant

CULTURE. Should be sown in a hotbed in February or March and the plants thinned out two to three inches apart when they have reached a height of about two inches. Set out in rich soil, when the weather is warm and settled, two feet apart each way.

BLACK BEAUTY. While the fruit is as large as the New York Improved it matures earlier, and is of a deeper and richer color. The plants are of robust growth and are very prolific. Being nearly two weeks earlier than any other variety, much larger crops are produced before the frost in the North. **By mail, postpaid, pkt., 10c; oz., 30c; ¼ lb., \$1.00; lb., \$3.75.**

Sweet Corn

EXTRA EARLY MAYFLOWER. A popular early white variety, bred for market garden use. Ears 8 to 12 rowed. Kernels clear white, plump and tender. Very productive for an extremely early variety. Matures 74 days. **Pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs. \$1.00; 10 lbs., \$1.85, postpaid.**

WHIPPLES EARLY WHITE. An excellent mid-season variety with deep kernel. Stalks grow strong and erect, commonly bearing two ears; ears 14 to 18 rowed well filled at tips. Kernels deep, medium narrow, pure white, sweet and tender. **Pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.85, postpaid.**

WHIPPLES EARLY YELLOW. Deservedly popular as a large eared second early sort, for home and market garden. Stalks sturdy and erect. Ears 12 to 14 rowed, well filled at tips. Kernels golden yellow, fairly deep, sweet and good flavor. **Pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.85, postpaid.**

STOWELL'S EVERGREEN. Midseason. More largely planted than any other Sweet Corn for home use, market and canning. The ears are large and freely produced. It is an exceptionally good canner and remains in good condition for cooking a long time. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.85.**

BANTAM OR GOLDEN EVERGREEN. About 82 days from planting to edible condition. A second early, one of the latest introductions to the sugar corn family. Stalks 7½ to 8 feet high. Ears thick, about 8 inches long. Grains golden yellow, exceedingly sweet. Very productive. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.85.**

HOWLING MOB. Medium early. One of the best flavored and most tender of the medium early varieties. Ears measure seven to nine inches in length, with twelve to fourteen rows of large white pearly grains. The stalks usually produce two ears. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.85.**

EIGHT ROW. A very profitable sort for home use or market. Ears 7 to 9 inches long, with 8 rows of delicious sweet kernels. Many stalks produce 2 or 3 fully developed ears. Main crop variety. Eating quality can not be excelled. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.85.**

EARLY EVERGREEN. Resembles Stowell's Evergreen in flavor, appearance and quality, but ripens ten days earlier, and remains in good condition as long as Stowell's. Ears measure about seven inches in length. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.85.**

COUNTRY GENTLEMAN or SHOE PEG. Late variety. The ears are seven to nine inches long and the cob is small, densely covered to the very tip with irregular rows of very long, tender white kernels of delicious flavor when cooked. Claimed by many to be the best flavored Sweet Corn. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.85.**

GOLDEN BANTAM. The earliest and sweetest yellow grained sugar corn. Ears are about 5 inches long. The delicious flavor and tender quality when cooked is not surpassed by any other variety of Sweet Corn, and is fast making it one of the most popular for home and market garden. The stalks are dwarf, attaining a height of about four feet. **By mail, postpaid, pkt., 10c; ½ lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.85.**

Pop Corn

WHITE RICE. A very popular and prolific variety. Ears long, and produced abundantly. Kernels long and slender, resembling rice grains. Pops pure white, and used largely for commercial purposes. Tender and delicious when popped. **By mail, postpaid, pkt., 10c; ½ lb., 15c; lb., 25c; 2 lbs., 45c; 5 lbs., \$1.00.**

SWEET CORN

All Varieties. Not Prepaid.
10 lb., \$1.60; 25 lb., \$3.50; 50 lb., \$6.50.

Endive

BROAD LEAVED BATAVIA. A heavy cropper that is very hardy. Excellent salads can be made from the broad thick leaves when blanched. **By mail, postpaid, pkt., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00.**

MOSS CURLED. The leaves of this variety are very finely divided and curled, forming a very attractive plant. It is very tender, of excellent quality, and will in time supplant the other varieties. **By mail, postpaid, pkt., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00.**

Lettuce

Iceberg

ICEBERG—50 Days. White Seed. A curled heading, medium large, crisp green variety, edges fringed and tinged with brown, a sort having outer leaves of strong ribs, enclosing an exceeding crisp and white interior—crisp as ice. By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.

NEW YORK or WONDERFUL—60 Days. White Seed. Possibly the most sought after Lettuce in the market today, certainly the most talked about. This crisp, hard Lettuce is served extensively on dining cars and in hotels and restaurants. It is a crisp, large heading variety, dark metallic green and slightly curled on the edges. Produces the most solid and compact head of any lettuce in the market. By mail, postpaid, pkt., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.50.

BIG BOSTON. The most popular of head Lettuce, as it is good for early, midseason and fall use. The large compact heads are bright, light green, blanching to rich yellow at the heart and are deliciously sweet, tender and crisp. It is an exceptionally good variety for market as the heads are very solid with few outer leaves. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.

BLACK SEEDED SIMPSON. The broad light green leaves, crumpled and twisted, form a large firm bunch, which blanches well and is decidedly crisp. One of the best bunching varieties. Marketable early in the season. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.

GRAND RAPIDS. Fine variety for forcing under glass, but also good for outdoor planting. The crisp light green leaves form a loose, rounded cluster that matures early. A very good market sort as it ships well, retaining its crisp qualities much longer than any other variety. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.

Muskmelons

CULTURE. One ounce seed will sow about 80 hills. The Muskmelon demands a light sandy soil, and planting should not be done until ground is dry and warm. Sow 6 to 12 seeds on a hill, the hills to be 6 feet apart each way and covered one-half inch. When the plants have produced their rough leaves thin to three plants to hill.

EMERALD GEM. Considered by many to be one of the best salmon-fleshed melons. It is a small variety, with dark green skin and flesh that is sweet and delicious. The vines yield heavily, and the fruit always sells well on the markets. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 95c.

ROCKY FORD. These melons are oval in shape and heavily netted, measuring about 5 inches in length. The smooth, light green flesh is delicious in flavor. A very good sort that has been on the market a long time and very popular with lovers of good melons. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 95c.

TIP TOP. One of the most popular and productive melons, and good for extra early and late crops. The fruit is large, nearly round and moderately netted. The flesh is solid, sweet, juicy, of fine flavor and can be eaten to the very rind. One of the best all around melons. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 95c.

HEARTS OF GOLD. A splendid mid-season variety. Larger than the Rocky Ford and more uniform. The rich golden flesh has the most excellent flavor and is very deep, having only a small seed cavity. Recommended for home or market gardens. If you have a good soil for melons it will pay you to grow a few acres. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 95c.

Benders Surprise

BENDERS SURPRISE. Large size and deliciously sweet. Flesh is deep orange colored and very thick. Light green with coarse netting. When ripe melons turn golden yellow tint which gives fruit an attractive appearance. Will keep in good condition and improve in flavor for five or six days after picking. Ripens medium early. Profitable sort to grow for home use, market or shipping. By mail, postpaid, pkt., 10c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.

EXTRA EARLY HACKENSACK. A good variety where an early crop is desired, and has so many good qualities that it has become immensely popular. The melons are large, flat and well netted, and the flesh is thick green of excellent flavor. A good seller on the markets. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 95c.

Dear Sirs:

I ordered some of your seeds last spring from a neighbor and they were fine. I am going to ask you to send me your seed catalogue so I can order for myself this spring.

Burton, W. Va., Mar. 20, 1933

Lucy S. Whisler.

Watermelons

CULTURE. One ounce will sow about 50 hills. Watermelons should have same cultivation as Muskmelons, but should be planted 8 to 10 feet apart.

COLE'S EARLY. An extra early variety that has a thin rind, beautiful bright red flesh, of fine texture and lusciously sweet. Melons are oval and of medium size. One of the best sorts for the home market. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

Keckley's Sweet

KECKLEY'S SWEET. One of the best melons for home use. The rind is thin, and the beautiful bright scarlet flesh ripens close to it. It is oblong in form and has glossy, dark green skin. The flesh is crispy and sugary without a sign of stringiness. The melons average 18 inches in length by 10 to 12 inches in diameter. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

Onions

WHITE PORTUGAL or SILVERSKIN. The bulbs are large with silvery skin, and sweet, tender, white flesh, which is mild in flavor. Our strain of this variety cannot be excelled. **By mail, postpaid, pkt., 10c; oz., 20c; ¼ lb., 60c; lb., \$2.00.**

PRIZE TAKER. An enormous yellow Onion that is three times the size of the Yellow Globe Danvers, and sometimes weighs four pounds. The skin is thin and bright straw-yellow, giving the bulbs a very handsome appearance. The pure white flesh is crisp, very sweet and mild in flavor. On account of its large size it matures about a month later than the Globe Danvers.

There is no more profitable sort for home or market garden.

By mail, postpaid, pkt., 10c; oz., 20c; ¼ lb., 60c; lb., \$1.75.

Prize Taker

ROUND LIGHT ICING. Fruits are medium sized, nearly round, greenish white, slightly veined or dotted with light green. The flesh is light red, sweet and crisp, seed white. Noted for its fine qualities and sells well in any market. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

TOM WATSON. One of the best shipping melons. The fruits measure 18 to 24 inches long and 10 to 14 inches in diameter, weighing as high as 50 pounds. The delicious deep red flesh extends close to the rind, which is dark green and very strong. A comparatively new variety that already has won for itself a reputation as a shipping melon. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

LONG LIGHT ICING. A long melon with skin very light green and sometimes reaches a weight of 40 to 50 pounds. The flesh is deep red and very finely grained. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

STONE MOUNTAIN. One of the latest introductions in the last few years is the Stone Mountain. Its use has grown by leaps. It is being shipped long distances with great success. The Stone Mountain does not carry more than one half the seed than do other similar varieties. Somewhat oblong in shape, rather light gray in color and white seed. Its eating qualities are distinctly superior to any other shipping variety. **Prices, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

Onion Sets

YELLOW GLOBE DANVERS. White Portugal or Silver Skin. You need take no chances on ordering our High Grade Onion Sets. These sets are sure to please you and produce profitable results. **By mail, postpaid, qt., 25c.** For prices on larger quantities see price list.

YELLOW GLOBE DANVERS. The most popular of the yellow Onions for market and home use, as it is one of the heaviest croppers and best keeper. The bulbs are very large, globe shaped, with small necks and a brownish yellow skin. The flesh is white, fine grained and mild. It is an enormous yielder, a crop of 500 to 800 bushels to the acre not being unusual. **By mail, postpaid, pkt., 10c; oz., 20c; ¼ lb., 60c; lb., \$1.75.**

WHITE PEARL. The best of all for small pickles and the earliest ripening onion. Bulbs are pure white, averaging 1½ inches in diameter. **By mail, postpaid, pkt., 10c; oz., 20c; ¼ lb., 60c; lb., \$2.00.**

Grow your own Protein. Many have found it exceptionally profitable to raise Soy Beans to put in the silo with corn.

Peas

PETER PAN.
Very large podded dwarf pea. Vines short and yield abundantly. Peas dark green. Very profitable sort for either home or market garden. It pays to plant at least a portion of your crop with this variety. By mail, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.25.

LAXTONIAN.
Large podded dwarf variety similar to Gradus, though a little earlier. Extra large, deep green pods are always well filled. By mail, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.25.

THOMAS LAXTON (Wrinkled). About four days later than Gradus. Peas are deeper, richer green, and are square at the end. By mail, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.25.

NOTT'S EXCELSIOR (Wrinkled). One of the most popular of the extra early varieties, especially with market gardeners. It is a close, compact grower with 3 inch pods tightly filled to the very end with large peas of exceptionally sweet flavor. By mail, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.25.

BLUE BANTAM. This variety resembles the Laxtonia very much, but is a little larger and more prolific. The pods are 3 1/2 to 4 inches long and well filled. The vines are 18 inches high and very strong. One of the best early peas for the home garden, or market. Prices, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 5 lbs., \$1.20; 10 lbs., \$2.25.

EARLY BIRD PEAS. A very hardy, productive, early, large podded variety which can be planted very early in the Spring. Pods are about four inches long and contain seven to nine peas of good quality. Peas are almost smooth and will withstand cold wet weather. A superior quality for an early large podded pea. By mail, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.25.

LITTLE MARVEL (Wrinkled). Vines grow about 15 inches high with pods 2 3/4 to 3 inches in length. Matures in about 60 days. Pods are considerably larger than Nott's Excelsior, often produced in pairs. The seed is green and of medium size. Highly recommended variety for home garden. By mail, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.20; 10 lbs., \$2.30.

Peter Pan

Dwarf Telephone

DWARF TELEPHONE. Much like the telephone except that the vine grows only about 2 feet tall. Fine large pods of dark green color, 4 to 4 1/2 inches long containing 8 or 9 large, green peas of extra fine quality. An excellent variety to follow early peas in the home garden. Prices, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.25.

ALASKA. An extremely early, smooth, blue seeded variety that is very productive. The vines grow 20 to 24 inches high, bearing well filled, medium sized pods. Matures in about 55 days and can be planted 10 days before it is safe to put the tender wrinkled sorts in the ground. By mail, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.10; 10 lbs., \$2.00.

FIRST AND BEST. A very early sort that is extremely popular for market and shipping. The pods are well filled with smooth peas, and usually mature at one time, so that the entire crop can be gathered in one picking. A good early variety. By mail, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$2.00.

GRADUS or PROSPERITY. One of the best wrinkled sorts. Vines are vigorous and produce uniformly large pods 4 to 4 1/2 inches long, nearly round and filled with large peas of delicious flavor. Matures in 55 days. By mail, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.15; 10 lbs., \$2.25.

Sugar Peas

MAMMOTH MELTING SUGAR. The largest, sweetest and most desirable of the Sugar Peas. Pods of this variety are so brittle that they snap without a string. Plants grow to a height of 5 feet and bear a profusion of large, broad pods. One of the best Sugar Peas. By mail, postpaid, pkt., 10c; 1/2 lb., 25c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25; 10 lbs., \$2.25.

TALL LUSCIOUS SUGAR. This variety is unequalled for sweetness and tenderness. Pods are thick and fleshy at all stages of growth, and are 5 to 7 inches long, and 1 to 1 1/2 inches wide. This variety grows 5 to 6 feet tall and branches freely if given proper support, producing abundantly for a long period. Blossoms are purple. By mail, postpaid, pkt., 10c; 1/2 lb., 25c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25; 10 lbs., \$2.25.

DWARF SUGAR. Dwarf in habit of growth. Matures in 60 days. Small sized pods which are very tender, sweet and delicious. Blossoms white. By mail, postpaid, pkt., 10c; 1/2 lb., 20c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.15; 10 lbs., \$2.25.

Get your crops three weeks earlier to Market. Use Hotkaps. See page 28.

Parsnips

A standard variety. Roots are of medium length, with a broad shoulder which gradually tapers downward. The skin is white, smooth and attractive. The flesh is sweet, fine grained and tender. Good for table use or stock feeding. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

Parsley

MOSS CURLED. The best and most improved strain. Beautifully curled and crumpled. Best for garnishing and flavoring. If cut when about three inches high it starts a new growth that will be better curled and a brighter color. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

Peppers

RUBY KING. A highly productive Red Pepper bearing fruit 4 to 6 inches long and 3 to 4 inches across at top, slightly tapering toward end. The flesh is mild and sweet, ideal sliced in mixed salads. Fine for stuffing with meats, rice, etc. **By mail, postpaid, pkt., 10c; oz., 30c; ¼ lb., \$1.00; lb., \$3.50.**

CALIFORNIA WONDER. An outstanding medium late variety for market garden and shipping. Plants vigorous, upright, prolific. Fruits 4-lobed chunky; very attractive, smooth, uniform and deep green, changing to bright crimson; flesh thicker than any other variety, sweet and mild. **Prices, pkt., 10c; oz., 35c; ¼ lb., \$1.00; lb., \$3.50, postpaid.**

Chinese Giant

CHINESE GIANT. An enormous Pepper measuring 12 inches in circumference and four to five inches long. It is an early and prolific sort. Plants grow about two feet high and carry an enormous load of fruit, often having appearance of being bunched together. Flesh is thick, tender, mild and sweet. **By mail, postpaid, pkt., 10c; oz., 50c; ¼ lb., \$1.50; lb., \$5.50.**

OSHKOSH. Best Yellow Pepper. The flesh is very thick and is the sweetest pepper grown. The peppers, before matured, are of a deep green color, large, smooth and best shape for stuffing. The color is golden yellow when ripe. **By mail, postpaid, pkt., 10c; oz., 50c; ¼ lb., \$1.50; lb., \$5.50.**

King of Mammoth. Grown by Luke Rohrer, Smoketown.
11 large Pumpkins from one stalk.

Pumpkins

KING OF THE MAMMOTH. The popular exhibition Pumpkin that is usually the winner at the fairs. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 90c.**

SUGAR or PIE. One of the best pie Pumpkins. An excellent keeper. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 90c.**

CUSHAW or CROOKNECK. Yellow pumpkin. One of the widely popular varieties. Matures in 75 days. Flesh yellow, solid and sweet. **By mail, postpaid, pkt., 5c; oz., 15c; ¼ lb., 35c; lb., \$1.00.**

Squash

Summer Varieties

SUMMER CROOKED NECK. An early variety with extra large fruits, often measuring 18 inches to 2 feet long. The flesh is of good quality and rich yellow in color. **By mail, postpaid, pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.**

EARLY WHITE SCALLOPED (*Pettypan*). A good shipping sort, which matures early. The flat scalloped fruits are creamy white in color, uniformly large and of good quality. **By mail, postpaid, pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.**

Fall and Winter Varieties

GOLDEN HUBBARD. Fine for home garden, being one-third to one-half smaller than the True Hubbard. The flesh is deep golden yellow, of fine flavor and cooks dry. **By mail, postpaid, pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.**

TRUE HUBBARD. A fine keeper and popular as a home and garden variety. The fruits are large, oval shaped, with dark green skin and very rich in flavor. An old standard sort that is planted extensively. **By mail, postpaid, pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.**

Kohl-Rabi

WHITE VIENNA. Short leaved. Bulb light green. Very rapid in growth. **By mail, postpaid, pkt., 10c; oz., 25c; ¼ lb., 65c; lb., \$2.00.**

Crimson Giant

SCARLET GLOBE. One of the earliest radishes and one of the best for forcing. Very small top. Bright red in color, very attractive, both in color and shape. Mild, crisp, juicy and tender. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

SCARLET TURNIP, WHITE TIPPED. Very popular market sort because of its attractive appearance. The Radishes are very deep scarlet in color with white tip. Flesh white and of fine quality. A great favorite for early planting outdoors. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

CHARTIER LONG SCARLET. A beautiful long Radish of deep crimson, shading to white at tip. Splendid for outdoor culture. Stays tender. The flesh is white, crisp and well flavored. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

LONG WHITE VIENNA or LADY FINGER. Grows 6 to 7 inches in length. The skin and flesh are snow white, crisp and juicy. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

WHITE STRASBURG. An excellent summer Radish which stands severe heat and grows quickly. Long and tapering, with skin and flesh pure white, firm, crisp and tender. Can be pulled five weeks after sowing, but may be allowed to grow, retaining its crispness even when the roots are old and large. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

FRENCH BREAKFAST. The ideal olive shaped radish. The color is bright red, tipped with white. Oblong in shape, is crisp and tender. A quick grower. Matures in 20 days. Exceedingly popular. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

Winter

WHITE CHINESE. This variety grows to enormous size, 12 to 15 inches long with a diameter of 4 to 5 inches. The flesh is crisp, juicy and tender. Agreeably mild in flavor these roots are easily stored in boxes packed in sand and will keep all winter. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

CHINESE ROSE or SCARLET CHINA. Medium size, 4 to 5 inches long. Skin deep rose. Flesh white, firm and compact. Not hard or stringy. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

Grassy Creek, N. C., Mar. 18, 1933.

P. L. Rohrer & Bro.

I have used your New Century Beet for the last three years. They are the finest I have ever seen.

Mrs. Annie E. Hale.

CRIMSON GIANT. Globe shaped, bright scarlet with crisp and solid white flesh. It is double the size of any of the early turnip shaped varieties, and suitable for forcing or early outdoor planting. It grows quickly and even attains large size, remains tender and of fine flavor to the last. Will prove a money maker for the home gardener, and its bright crimson color makes it a seller on first sight. **Prices postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

ICICLE. The finest early, pure white, long radish. On good soil they are ready in 20 to 25 days, and will remain crisp and tender longer than any first early variety. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 70c.**

Icicle

Salsify

MAMMOTH SANDWICH ISLAND. A tender, delicious variety that is far superior to other sorts. The roots are larger and thicker. Very mild and delicately flavored. This variety is planted very largely by market gardeners and should find a place in every home garden. **By mail, postpaid, pkt., 5c; oz., 15c; ¼ lb., 50c; lb., \$1.50.**

PROTECT YOUR FLOWERS

These Flowers will need EVERGREEN, the non-poisonous insecticide that kills all insects, to protect them. For description and prices, see page 28.

OXHEART TOMATO. Distinct attractive variety, recently introduced and increasingly popular. Fruits extremely large, somewhat rough, heart shaped, pink, very solid, meaty, and of mild flavor. Desirable as a specialty for the home and market gardener. **Pkt., 10c; oz., 50c; ¼ lb., \$1.50; lb., \$5.50; postpaid.**

EARLIANA. A real early Tomato, one that will make fruits of good size, solid and good quality. The flesh is solid and has few seeds. **By mail, postpaid, pkt., 5c; oz., 25c; ¼ lb., 85c; lb., \$3.00.**

CHALKS EARLY JEWEL. Bright scarlet, extra early in maturing, coming in very shortly after Earliana, but is a heavier cropper, with fruits of larger size and sweeter flavor. **By mail, postpaid, pkt., 5c; oz., 25c; ¼ lb., 85c; lb., \$3.00.**

Ruta-Baga

AMERICAN PURPLE TOP. Grows very large in size but remains solid and is fine grained. Roots are purple at top and oblong in shape with short tap root. The flesh is deep yellow, mild and sweet. Fine for table use or stock feeding. This is a very large yielder and keeps well. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 65c.**

Spinach

BLOOMSDALE (Savoy Leaved). This variety has wrinkled leaves. It is the hardiest variety and very prolific. The thick fleshy leaves are crumpled and very delicious. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 15c; lb., 35c; 10 lbs., \$2.50.**

KING OF DENMARK SPINACH. A new variety that is far superior to all other varieties. It will stand from ten days to two weeks longer before running to seed than any other variety. This is a great advantage over the other varieties for both the home garden and the commercial grower. Large thick dark green leaves. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 15c; lb., 40c; 10 lbs., \$3.00.**

Swiss Chard

GIANT LUCULLUS. Stalks grow tall with broad, thick, fleshy, crumpled leaves, which are delicious. A fine vegetable that requires little attention and will furnish crop from July until frost. Very tasty when cooked in same manner as Spinach. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.**

P. L. Rohrer & Bro.

We received the seeds and are satisfied. We also appreciate it very much that you served us so quick.

Tomatoes

JOHN BAER. The introducer claims that this is one of the very earliest Tomatoes. In addition to its earliness it is an enormous yielder. The fruits are perfect in shape, solid, high crowned and of a brilliant red. **By mail, postpaid, pkt., 5c; oz., 25c; ¼ lb., 85c; lb., \$3.00.**

STONE. One of the best main crop red Tomatoes. The fruits are large, smooth, bright scarlet, of fine quality and has a small core. A heavy yielder of uniformly large fruits, and has proved to be a tremendous money maker wherever used. Fine for canning or home garden, and long considered the standard main crop Tomato for all purposes. **By mail, postpaid, pkt., 5c; oz., 25c; ¼ lb., 75c; lb., \$2.50.**

PONDEROSA or BEEFSTEAK. The largest tomato yet introduced, frequently weighing a pound or more. The fruit is deep purple in color, slightly reddish with very solid, luscious flesh and small seed cells. Fine for family garden and market. This sort is very fleshy which makes it a good slicing Tomato. **By mail, postpaid, pkt., 10c; oz., 40c; ¼ lb., \$1.50; lb., \$5.50.**

MAR-GLOBE. A splendid new variety developed by the U. S. Dept. of Agriculture. Produces large smooth globe shaped, deep scarlet fruit that ripens evenly and does not crack. The flesh is very fine quality. Highly productive. **By mail, postpaid, pkt., 10c; oz., 50c; ¼ lb., \$1.50; lb., \$5.50.**

BONNY BEST. A vigorous growing sort of spreading, upright habit, with large, smooth, deep green foliage. The fruits are of good size and borne in clusters of three to five. Rather flat, but smooth and do not crack. **By mail, postpaid, pkt., 5c; oz., 25c; ¼ lb., 85c; lb., \$3.00.**

Turnips

PURPLE TOP GLOBE

Keeps well and fine for table use. Turnips measure 6 inches and more in diameter. They are clear creamy white below the rich purplish red above. The flesh is white and firm, crisp, and of mild flavor. Used extensively for stock use. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 20c; lb., 55c.**

COWHORN

Long white, mainly used for stock feeding, but excellent for table use. It is a rapid grower and is fine for turning under with Crimson Clover as a green manure crop. The roots are large, long, carrot like shape, and grow partly above the ground. **By mail, postpaid, pkt., 5c; oz., 10c; ¼ lb., 20c; lb., 50c.**

Honey Brook, Pa., Apr. 25, 1933.

Chas. Kuch.

Asters

CULTURE. Seed may be sown outdoors as early as possible after ground is warm and dry, or for earlier blooming seed may be sown indoors or in cold frames and transplanted in the open ground after danger of frost is over. Sow seed about one-half inch deep, with soil firmly pressed down. Rows about 18 inches apart. We do not recommend sowing Asters in the same ground two years in succession.

ROHRER'S LATE BRANCHING.

A very strong growing Aster usually not coming into bloom until the latter part of August, but producing on very long stems, full petalled, exceptionally large and deep double blossoms of fine form. The petals are long, rather broad, and the blooms stand shipment well. The plants are branching in habit of growth and are about two feet high. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 25c; oz., 85c; $\frac{1}{4}$ lb., \$2.25; lb., \$8.00.

Queen of the Market Aster

QUEEN OF THE MARKET. This variety is very desirable and productive. Our mixture contains all colors of the best and most desirable sorts. Two weeks earlier than any other variety. The plants are of a branching habit, spreading 16 to 18 inches high, bearing on long stems from 10 to 15 finely formed, double blooms. A profitable variety to grow for early market or for home garden. By mail, postpaid, mixed colors, pkt., 10c; $\frac{1}{4}$ oz., 25c; oz., 85c; $\frac{1}{4}$ lb., \$2.25; lb., \$8.00.

Antirrhinum (Snapdragon)

New Giant Flowered Snapdragon. Antirrhinums in recent years have become very popular and are now one of our very best flowers. No other flower has such a wide range of colors. Whether planted for garden or cut flowers we know of few flowers as desirable. For blooms the first season sow the seed very early indoors, or under glass, and transplant as soon as the ground is warm and dry, setting plants about ten inches apart, and giving them plenty water. If the plants are set out in May they will bloom in June and July, and continue until late in the fall. Seed sown in the open ground in the early spring will produce plants that flower in August. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 25c; oz., 75c.

For a really handsome border or flower bed, use Rohrer's Larkspur. So easily grown.

Ageratum (Floss Flower)

For beds and borders this is one of the finest of all low growing plants, as it is literally covered with blooms from early summer until frost. Unlike any other plants the rain does not spoil the flowers, nor the sun fade out their color. Easily raised from seed, which is usually started in a window, or hot bed, and transplanted outside in May. The seed can be sown outdoors in May. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 15c; oz., 40c.

Dianthus (Pinks)

The great variety of brilliant colors and the profusion of blooms has made these garden pinks one of the most popular flowers. The plants grow about one foot high, and are particularly fine when planted in masses in beds and borders. Sow the seed outdoors in the early Spring and in a few weeks the plants will be up and in full bloom. If plants are too thick thin out to about six inches apart, when plants are two inches high.

ROHRER'S SPECIAL MIXTURE. Double. This mixture contains all the various kinds of double blooms, and will supply a wonderful array of blooms in the garden all summer long. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 30c; oz., 90c.

MIXED COLORS, SINGLE BLOOMS. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 20c; oz., 50c.

Cosmos

EARLY FLOWERING GIANT COSMOS. These are among the most popular and early grown annual flowers, making a wonderful display in beds and borders in the garden, and furnishing an abundance of cut blooms for the house decoration in the fall when other flowers are scarce. Sow the seed outdoors just as soon as danger of frost is over. Also may be started in cold frames and transplanted. Cosmos thrive in any good soil. Transplant about eighteen inches apart. By mail, postpaid, pkt., 10c; oz., 40c.

Delphinium (Hardy Larkspur)

These are the most popular of all hardy plants for the garden. The tall spikes of lovely flowers standing erect above the dark green foliage make a wonderful display. They begin to bloom in June. They are noted for their great variety of height. A good deep soil means larger and better flowers. Seed may be sown in the open ground from April until August, but it is not likely to flower until the next year. Prize Mixture. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 30c; oz., \$1.00.

EVERGREEN, Non-Poisonous insecticide will protect your flowers by killing all insects. See page 28.

Larkspur

Hardy annual. They begin blooming in July and continue until frost. They make handsome beds and borders, and look extremely well in clumps of shrubbery. Few people realize how easy it is to grow these beautiful flowers, and how very attractive they are in the garden as cut flowers. The tall stock flowered varieties grow two to three feet high with spikes of large double flowers, over a foot long, in many shades of colors.

DOUBLE TALL STOCK FLOWERED. Mixed Colors. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ oz., 30c; oz., 50c.

Marigold

The African and French Marigolds are old favorites. A free flowering annual easy to culture. Both are extremely effective. The African has uniformly large, yellow and orange colored flowers and are well adapted for large beds or mixed borders. The French are dwarf in growth with beautifully striped flowers and are better suited for bedding purposes. Good blooms are successfully obtained from seed sown in the open ground after danger of frost is past.

AFRICAN. Tall double mixed. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ oz., 30c; oz., 50c.

FRENCH. Dwarf double mixed. By mail, postpaid, pkt., 10c; $\frac{1}{2}$ oz., 30c; oz., 50c.

Mignonette

A well-known, sweet scented garden favorite that everybody should grow. By sowing seed in April and again in July you can have a succession of blooms until frost. No garden is complete without Mignonette, the fragrance of which makes it indispensable for bouquets.

LARGE FLOWERING. Sweet scented, all sorts, finest mixed. By mail, postpaid, pkt., 10c; oz., 25c.

Nasturtium

ROHRER'S MIXED, TALL SORTS. A combination of many tall varieties. Colors white, cardinal, orange, rose, scarlet, etc. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., 90c.

ROHRER'S MIXED, DWARF SORTS. These are adapted for beds and borders. Grow 8 to 15 inches high. A mixture of best sorts, producing when in bloom, an agreeable effect in colors of scarlet, crimson, bronze, gold and white. By mail, postpaid, pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.

Phlox (Drummondii)

Unequaled as a magnificent display of many and brilliantly colored flowers. They are very easily cultured and bloom profusely through a long season. Useful as window-garden plants and very desirable for combining in mixed bouquets.

Seed is usually sown early in the Spring outdoors. A sunny location is desirable. Well pulverized and rich mellow soil should be used, and the seed, which germinates very slowly, covered with one-fourth inch of fine soil firmly pressed down. Our mixture is unexcelled for profusion of blooms and wide range of brilliant colors. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 20c; oz., 75c.

Salvia (Scarlet Sage)

BON-FIRE. The brilliant red flowers of this popular annual borne on long stately spikes, standing well above the foliage and blooming until frost, give this plant a prominent place in every garden. Seed should be started under glass or in boxes in February and March, and transplanted after danger of frost is past. A compact growing early flowering Salvia, two feet high, covered with long spikes of brilliant flowers. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 50c; oz., \$1.50.

Petunia

Few annual plants equal in effectiveness the Petunia for growing in beds and borders, or in window and porch boxes. They commence flowering early and continue a sheet of blooms until frost. Plant the seed, which is exceedingly fine, in a warm sunny place. Any good garden soil well pulverized and in good condition may be used. Cover the seed with about one-eighth of an inch of soil firmly pressed down. Re-seeds itself when once planted.

HYBRIDA. Striped and blotched. Includes striped and blotched flowers in a wide range of brilliant colors. A very satisfactory mixture. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 25c; oz., 75c.

HYBRID DWARF MIXED. Plants compact growing. A very choice mixture of many shades and colors. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 35c; oz., \$1.25.

Pansy

ROHRER'S MAMMOTH PANSY MIXTURE.

Without doubt one of the grandest mixtures ever offered. It is imported by us direct from most noted Pansy grower in Europe, and covers a wide range of colors. The plants distinguish themselves by their robust growth, and form compact bushes of round shape, with strikingly large, healthy looking foliage. The individual petals are exceedingly broad and cover each other in such a manner as to make the flowers almost double; the beauty, brilliancy, and richness of color being the most striking. The more flowers you remove, the more and larger the blooms become. By mail, postpaid, pkt., 15c; $\frac{1}{4}$ oz., \$1.00; $\frac{1}{2}$ oz., \$2.00; oz., \$3.50.

**HOTKAPS for BIGGER,
EARLIER CROPS!**

Only \$10.00 per 1000

See Page 28 for Details

Include "New Century Beets" on your order. You'll find them one of the best beets you could grow.

Scabiosa (Mourning Bride)

This annual deserves a space in your garden. It is very easily and quickly grown. Blossoms very freely during summer and fall and is one of the finest of all cut flowers for the house.

GIANT FLOWERING MIXTURE. A special strain of tall double varieties. A very choice mixture. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 15c; oz., 50c.

Sweet William

A well known attractive free flowering hardy plant bearing in the early summer flowers of rich and varied colors that make a splendid show in beds and borders.

Double mixed. Double flowers in a splendid mixture of colors. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 20c; oz., 60c.

Sweet Peas

Spencer Type

CULTURE. One ounce of seed will plant a row 25 feet long. To get good Sweet Peas the seed should be sown as soon as possible. The best soil is one containing some clay. The land should be made rich with manure or fertilizer. The vines should be watered in dry weather.

ROHRER'S FANCY MIXED. A mixture of the best blend of Sweet Peas in cultivation. All choice giant-flowering varieties of every color and type. A good mixture at a low price. By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.

Inoculate your Sweet Peas with Stimugerm. Garden Size, postpaid, 25c.

ROHRER'S MIXED SPENCERS. The newest introduction in Sweet Peas. The flower stems are 10 to 12 inches long, very strong, and usually bear four blooms. This mixture is far superior to the ordinary mixture and includes many of the best Spencer varieties. By mail, postpaid, pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 50c; lb., \$1.75.

For the most luscious of beets order the "New Century." As sweet and tender next spring as the day you dig them. Order a quantity.

Zinnia (Youth and Old Age)

The Zinnia is easily grown and begins to bloom early in the summer and continues until frost. Sow the seed early in the Spring in the open ground in rich soil covering about one-fourth inch. When the plants are young thin to six inches apart. It is best to sow the seed where they are to flower.

Zinnia or Youth and Old Age

ing about one-fourth inch. When the plants are young thin to six inches apart. It is best to sow the seed where they are to flower.

DAHLIA FLOWERING MIXED. A new Zinnia that bears mammoth flowers similar to the Dahlia. This type is especially good as a cut flower. A splendid combination of brilliant colors. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 25c; oz., 90c.

Verbenia

Verbenia

For a brilliant display in the garden or beds, these Mammoth Flowering Verbenias with their giant heads of showy flowers that are in bloom from July until frost cannot be surpassed. For very early flowers start the seed indoors and transplant. Seed sown outdoors in May will make blooming plants in July.

MAMMOTH. Extra large flowered. A fine mixture. Cultivated from select plants. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 20c; oz., 60c.

Sweet Alyssum

LITTLE GEM. A beautiful white sort for edging, borders, and rock work. The plants grow about six inches high, produce hundreds of flowers and form a compact mass of blooms usually fifteen to eighteen inches across. Hardy Annual. By mail, postpaid, pkt., 10c; $\frac{1}{4}$ oz., 15c; oz., 40c.

Get Crops to Market 3 Weeks Earlier

Germaco HOTKAPS—"individual hot-houses for every plant"—are made of waxed paper in the form of a cone which completely covers the plants—the **only way to fully protect** them from frost. HOTKAPS also protect against rain, wind, ground-crusting and insects—your assurance of faster-growing, hardier plants, with larger yields and greater profits, because you market earlier.

HOTKAPS are inexpensive to use. One man can "set" over 3000 of them per day.

Write us now about this money-making crop necessity, or simply order your season's supply now.

INCREASE YOUR GRAIN PROFITS WITH *New Improved* CERESAN

Lower your grain production costs per acre—enlarge your profit—by increasing yields with *New Improved* Ceresan. It is unusually effective in controlling bunt or stinking smut of wheat, covered smut and stripe of barley, and oats smuts. Frequently improves the stand and increases the yield of grain 1 to 5 or more bushels per acre.

New Improved Ceresan is easily and quickly applied by 20 to 25 revolutions of the seed treater, or, by 3 turnings with a shovel. Seed should be treated 24 hours before planting. No disagreeable, nauseating dust to be breathed—no swollen or injured seed—no drill damage for the user of *New Improved* Ceresan.

COST—Just $1\frac{7}{8}$ to $2\frac{1}{3}$ cents per bushel of seed. One pound treats 32 bushels of wheat, oats, and barley.

Ceresan gave one Illinois farmer this increased yield of 6.9 bushels of wheat per acre.

Prices: 1-lb. tin, 75c.; 5-lb. tin, \$3.00. Free Pamphlets.

DISEASE PROTECTION FOR $\frac{1}{4}$ TO 1c PER POUND OF SEED

Prevent the many damaging diseases of flowers and vegetables that are carried on the seed, by disinfection of the seed with Semesan. It destroys the destructive diseases on the seed and protects them from the rots in the soil, which results in increased stands of more vigorous, healthy plants that yield larger, quality crops. Sprinkling of the seedling beds with Semesan solution effectively prevents damping-off. Recommended especially for seeds, bulbs, gladiolus corms, dahlia tubers, and rose bushes. Easily applied as a liquid or dust. One ounce treats 15 to 30 pounds of seed.

Costs $\frac{1}{4}$ to 1c. per pound of seed. Directions in every can.

1—Untreated Calendula seed—18% germination.
2—Soaked in liquid Semesan 30 minutes—44% germination
3—Soaked in liquid Semesan 1 hour—67% germination.

Prices: 2 oz., 50c.; 1 lb., \$2.50; 5 lbs., \$11.75; 25 lbs., \$46.25. Free pamphlet.

New Improved SEMESAN BEL TREATMENT OF SEED POTATOES PAYS

Only 0.4 of a bushel of the average yield increase of 35.4 bushels reported above was required to pay for the *Improved Semesan Bel*, leaving a return on money invested of 9830%.

Seed potato treatment will bring you more profit than ever before. *New Improved* Semesan Bel—the quick dip treatment—has cut treating costs to $1\frac{1}{2}$ c. to 3c. per bushel of seed and gives equal or better control of seed-borne Rhizoctonia and scab than the old soak treatments. It protects seed pieces against rotting, insuring maximum stands; gives more consistent increases in yield and consequently larger profits. It costs less in time and labor than the old treatments. It is easily and quickly applied. Just mix one pound of *Improved Semesan Bel* with $7\frac{1}{2}$ gallons of water, dip your seed potatoes, drain, and plant. One pound treats 60–80 bushels of seed potatoes.

Prices: 4 oz., 50c.; 1 lb., \$1.75; 5 lbs., \$8.00; 25 lbs., \$31.25; 100 lbs., \$120.00. Free Pamphlet.

New Improved SEMESAN JR. INCREASES STANDS AND YIELDS

Semesan Jr. increased the yield of field corn 21.3 bushels per acre over the untreated seed planted in the same field.

Four bushels more corn per acre can reasonably be expected by any farmer that treats his seed corn before planting, Illinois Experiment Station tests show. Field or sweet corn dusted with *New Improved* Semesan Jr. is protected from destructive *Diplodia* and *Gibberella* root rot carried by the seed, and from rotting in the cold, wet soil. *New Improved* Semesan Jr. insures better stands and yields of corn. In 26 out of 28 tests, it increased the yield as high as 22%, and gave an average increase of nearly 10%. It does not reduce the rate of planting. The cost of treating field corn is only approximately $2\frac{1}{2}$ to 3c. per acre.

Prices: 4 oz., 50c.; 1 lb., \$1.50; 5 lb., \$7.00; 25 lb., \$28.75. Free Pamphlet.

Fight Bugs and Blight with

Pyrox

REG. U.S. PAT. OFF.
TRADE MARK REGISTERED

PYROX is the powerful spray which kills chewing insects, prevents fungous diseases and stimulates foliage. It is a perfect mixture. Easy to prepare, sprays through the finest nozzle, stays on the hardest rain.

Farmers have found it pays to give up spraying with home made Bordeaux. Instead they use Pyrox. It not only saves time and trouble but it coats the plant like paint, while

home made Bordeaux leaves room between drops for the insects or disease to attack the plant. This is because Pyrox is made of perfect ingredients that go into complete suspension, will pass through the smallest nozzle. It will not clog and the pressure will force it out, not in large drops, but in a fine mist that completely covers the leaves. We recommend that you protect your farm crops with Pyrox.

Pyrox wastes no time and labor. Simply mix with water according to directions and within five minutes you are ready to spray. One pound of Pyrox makes 5 or 6 gallons of spray. Prices: 5 lbs., \$1.70; 10 lbs., \$2.90; 25 lbs., \$5.00; 100 lbs., \$12.00; 300 lb. bbl., \$30.00.

PYROX WITHOUT POISON. A paste fungicide that is a comparison to Pyrox. This material contains no Calcium Arsenate and is not an insecticide. Packed in 100 and 300 lb. containers. Used principally on potatoes and celery. Use 18 lbs. to 100 Gallons of Water. Prices: 100 lbs., \$11.50; 300 lbs., \$28.50; 500 lb. bbl., Price on Request.

NICOTINE PYROX is a special new spray which performs all the regular Pyrox functions and has an additional attraction in that it kills sucking insects—like aphids. It is the first truly complete spray—an indispensable item for successful gardening—for vegetables, small fruits and flowers. 5 lbs., \$1.75; 10 lbs., \$3.00.

Bowker's Copper Lime Dust

BOWKER'S COPPER LIME DUSTS have met with marked favor among the many users of these products by reason of their outstanding quality. Many years of experience in their manufacture and a clear understanding of the user's requirements have been given careful consideration in producing this product. Bowker's dusts are so fine and fluffy they pass through the duster without clogging, issuing in a cloud which completely envelops the plant, giving maximum coverage and protection.

The following strengths are standard, but we will quote on other strengths, if desired.

"9" Copper Lime Dust (equivalent to 25% Monohydrated Copper Sulphate or 36% Copper Sulphate). 100 lb. Drums. Write for Prices.

"9-5" Copper Lime Arsenic Dust—9% Copper—5% Arsenic (Same as "9" plus 13.25% Calcium Arsenate which is equivalent to approximately 20% of the commercial calcium arsenate.) Write for Prices.

BOWKER'S CALCIUM ARSENATE is a powerful poison which kills potato bugs, bean beetles and other leaf-eating pests found among truck crops. It may be applied either wet or dry and is cheaper than Arsenate of Lead. 2 lbs. to 50 gallons of water or 1 lb. to 9 lbs. of Hydrated Lime. Write for Prices.

BOWKER'S ARSENATE OF LEAD is most effective as a poison for worms and insects which eat leaves of plants, fruit trees, etc. It is at its best in powder form in that it does not deteriorate from standing. Dust it on the leaves or mix 2 lbs. with 50 gallons of water. Write for Prices.

BOWKER'S SPECIAL POWDER NO. 1 is recommended especially to keep potatoes and tobacco free from bugs and rot. It may be used dry or mixed 6 lbs. to 50 gallons of water. \$12.50 per 100 lbs.; 5 lb. Bag, 75c.

BOWKER'S BORDEAUX MIXTURE in powder form is prepared especially to prevent Blotch, Cherry leaf Spot, celery blight, tomato leaf spot, blight and leaf hoppers on potatoes. It is a product superior to the home-made Bordeaux mixture in suspension, adhesive and spreading qualities. 6 lbs. to 50 gals. water equals 3-3-50. 8 lbs. to 50 gals. water equals 4-4-50 mixture. 4 lbs., 52c.; case (48 lbs.), 12c. lb.

LIME SULPHUR. Concentrated Liquid Lime Sulphur is used 1 gal. to 9 gals. water for dormant spraying and 1¼ gals. to 50 gals. water for summer spraying. Dry Lime Sulphur (unusually fine powder) is used 15 lbs. to 50 gals. for dormant spraying and 6 lbs. to 50 gals. for summer spraying. Both are used to control scale, insects and fungous diseases of fruit. 5 lbs., \$1.20; 10 lbs., \$2.20.

HAMMOND'S SLUG SHOT.
Hammond's slug shot is used from ocean to ocean. A light composite fine powder, easily distributed either by dusters, bellows or with water by spraying. Thoroughly reliable in killing cut worms, potato bugs, cabbage worms, chicken lice, sow bugs, Mexican bean beetle and army worm. **1 lb., 25c; 5 lbs., 90c. Postage or Express Extra.**

BLACK LEAF "40." For lice on plants. These destructive insects get on all kinds of plants, cabbage, potatoes, beets, radishes, turnips, lettuce, cucumbers, peas, etc. Black Leaf "40" is the one most effective spray. It kills these lice as soon as it touches them and does not harm vegetables and flower plants when used as directed. Recommended by Experiment Stations throughout the United States. As a spray for soft bodied sucking insects. May be combined with other sprays. Does not clog the nozzle.

1 oz. bottle, 35c., makes 5 to 10 gallons.
5 oz. bottle, \$1.00, makes 25 to 60 gallons.
2 lb. can, \$3.00, makes 300 to 500 gallons.
5 lb. can, \$5.75, makes 500 to 1000 gallons.
10 lb. can, \$10.00, makes 1000 to 2500 gallons.

Cannot be sent by mail

Calispray Dusters

California Beauty Duster

This duster is made to suit the needs of small truck farms. Moderate in price, but a high class machine. All inside working parts are coated with a rust-resisting finish, better than galvanizing, insuring long wear.

Bearings are of brass, and bellows are hinged. Will throw a cloud of dust ten feet. Capacity 12 pounds.

Equipped with hose, tubing and spoon to reach under side of leaves on the ground without stooping.

Weights 13 lbs. ready to ship. Price **\$12.00** in first, second and third shipping zones.

American Beauty Duster

AMERICAN BEAUTY DUSTER

The world's finest one-man duster. The only force feed duster built. Lumps are crushed and damp dusts forced through the screen. Feed is instantly adjusted. The only duster made that will not pack under pressure.

Bellows are not hinged, so that full benefit of entire stroke is accomplished at each movement. This is why we produce volume and smoothness in operation. Blows dust 15 feet.

Equipped with hose, two lengths of tubing for tall trees, and spoon for ground work. Capacity 15 lbs. Weighs 18 lbs. ready to ship. Price, **\$18.00, postpaid** in first, second and third zones. *Write for booklet.*

Terrafume

The Ideal Insect Killer

Destroys Insect Life at the source (Egg, Larva and Pupa). Eliminates the matured Insect and the possibilities of propagation. Price, **Per Gallon, \$10.00.** **Cannot be mailed.**

Increase Your Milk Yield by using Kow-Kare

Kow-Kare works two ways to help you make more money from your cows. First by building up and maintaining a health standard to throw off disease and endless worry. Secondly by aiding the organs of digestion to convert dry rich winter feeds into milk—without waste—it brings back your feed money via the milk pail plus a real profit.

USE KOW-KARE WHEN COWS FRESHEN

Many serious ills have their origin at calving time when the average cow is lowest in vitality and resistance. At no time can Kow-Kare help you more definitely than at this critical period. Large can, \$1.00; small can, 55c. Postage extra.

USE BAG BALM FOR COWS' UDDERS

Bag Balm insures quick healing for chaps, cracked or injured teats, inflammation, etc. Pleasant to use. 10 oz. package, 60c. Postage extra.

ROHRER'S BRED-RIGHT SWEDISH SELECT SEED OATS. A MONEY MAKER.
GROWN ESPECIALLY FOR SEED PURPOSES.

Lancaster Co. Sure Crop.

DON'T BUY YOUR SEED CORN UNTIL YOU HAVE READ OUR CATALOG

A small section of Lancaster County, the richest agricultural County in United States is one of the few sections where a normal crop exists. ROHRER'S HIGH GRADE SEED CORN comes from this section every year and fortunately we are again able to furnish excellent seed. Due to Excessive Rains and Storms much seed of inferior grade may be offered at slightly lower prices, but REMEMBER GOOD SEED CORN MUST COME FROM A GOOD CROP, and considering quality with price ROHRER'S SURE-PAY SEED CORN CANNOT BE EXCELLED anywhere.

See page 8 for varieties and description.
